## PSQL-7 - PHP and MySQL Level 1 - Richard Tan

Question: Way course was taught aided effective learning\_

Respondent	Response
4	Too much copying, not enough creating. I would have liked more exercises where participants would need to write their own code and not copy everything from the presenter's notes.

Question: The presenter was knowledgeable about subject\_

Respondent	Response
1	I have completed many IT courses in the past, however I found Richard Tan to be the most knowledgeable presenter in the relevant subject matter that I had ever experienced.

Question: Course was delivered at the level expected\_

Respondent	Response
1	The course delivered much more than I had expected. Richard went beyond the subject matter at the request of students, and I was therefore able to learn more sophisticated techniques usually reserved for professionals in the industry.
4	It was a bit too slow, could have been more challenging. The 2 days could have been taught in one day. Too many issues with some participants not having pre-requisit knowledge.

Question: Quality course materials provided\_

Respondent	Response
1	The course material was exceptionally well structured.

Question: Overall satisfaction with quality of the course\_

Respondent	Response
1	I was so satisfied with the quality of the course that I am glad that I have enrolled for the advanced PHP/SQL course starting next month.
3	Great course, great instructor but I will make onepoint. I would like to see clearer pre-requisites. There was a few students who simply did not have the requisite knowledge to take this course and this slowed us down a bit. I was sat next to one of these guys for the first session and he proved a constant distraction. This took the gloss off what was otherwise an excellent course.
